

- P-01 Exploration of novel kinesin-targeted anticancer drugs using yeast-based platform**
Fara Difka Afdilla (Hiroshima University, Japan)
- P-02 Redesigning Human Intelligence: A Pharmacological and Computational Approach to Evolving Human Cortical Organoids**
Hiroto Akuta (Hiroshima University, Japan)
- P-03 Generation of natural and synthetic hypo-immunogenic human iPS cells**
Jonathan Arias (VU EMBL partnership institute for gene editing technologies, Lithuania)
- P-04 ERRγ as a Metabolic Gene in the Specification of Acid-Pumping Gastric Cells**
Sumimasa Arimura (Baylor College of Medicine, USA)
- P-05 Artificial kinetochore beads establish a biorientation-like state in the spindle**
Kohei Asai (RIKEN Center for Biosystems Dynamics Research, Japan)
- P-06 Generating patient-derived lung normal and tumour organoids from different cells of origin and with different mutational background**
Vittorio Barbe (The Francis Crick Institute, UK)
- P-07 A many-species view of genomic architecture reveals general rules**
Rory Thomas Cerbus (RIKEN Center for Biosystems Dynamics Research, Japan)
- P-08 Directing the cellular and molecular mechanisms of inflammation to drive heart regeneration in adult zebrafish**
Shuk Han Cheng (City University of Hong Kong, Hong Kong)
- P-09 3D Printed Hydrogel Scaffold Loaded with Silver Nanoparticles for Localized Photothermal Therapy in Melanoma**
Jayita Das (Nagoya City University, Japan)
- P-10 Systemic aberrant sympathetic neurogenesis driven by Schwann cell precursors and its role in neurocristopathy**
Hideki Enomoto (Kobe University Graduate School of Medicine, Japan)
- P-11 Transient reprogramming induces DNA methylation age reduction in human fibroblasts**
Qi Fang (Center for iPS Cell Research and Application (CiRA), Kyoto University, Japan)

- P-12 Radiation-induced stem cell competition in intestinal organoids**
Yuki Fujimichi (Central Research Institute of Electric Power Industry (CRIEPI), Japan)
- P-13 Compensatory mechanism under choline deficiency in *Drosophila melanogaster***
Yuka Fujita (RIKEN Center for Biosystems Dynamics Research, Japan)
- P-14 Gene-scale *in vitro* reconstitution reveals direct control of chromatin architecture by histone acetylation patterns**
Yohsuke Fukai (RIKEN Center for Biosystems Dynamics Research, Japan)
- P-15 Mathematical modeling of yolk granule motion in early *Drosophila* embryos**
Motohiro Fujiwara (RIKEN Center for Biosystems Dynamics Research, Japan)
- P-16 Generation of bladder organoids from adult mouse urothelium**
Mizuki Fukuda (RIKEN Center for Biosystems Dynamics Research, Japan)
- P-17 Dietary Availability Acutely Influences Puberty Onset via a Hypothalamic Neural Circuit**
Teppey Goto (RIKEN Center for Biosystems Dynamics Research, Japan)
- P-18 Assessment of clonal variations in mitochondrial DNA of human iPSCs**
Karen Kai-Lin Hwang (Kyoto University, Japan)
- P-19 Mechanism of nuclear condensate miscibility**
Shoma Inoue (The University of Tokyo, Japan)
- P-20 Systemic aberrant sympathetic neurogenesis driven by Schwann cell precursors and its role in neurocristopathy**
Keisuke Ito (Kobe University, Japan)
- P-21 SSBD: Global sharing of bioimaging data**
Hiroya Itoga (RIKEN Center for Biosystems Dynamics Research, Japan)
- P-22 Cdh2 as a Hes7 downstream target regulates presomitic mesodermal cell differentiation by supporting FGF signaling**
Xueqi Jia (RIKEN Center for Brain Sciences, Japan)
- P-23 Phase transition in colocalization of multiple Brownian particles**
Takahiro Kanazawa (The University of Tokyo, RIKEN Center for Biosystems Dynamics Research, Japan)

- P-24 Post-blood meal amino acid metabolism for egg maturation in the yellow fever mosquito, *Aedes aegypti***
Yusuke Kato (RIKEN Center for Biosystems Dynamics Research, Japan)
- P-25 Multiple Sources of Wnt Secretion Cooperatively Regulate Sensory Cell Specification and Organization during Cochlear Development**
Ippei Kishimoto (Stanford University, USA)
- P-26 Function and regulatory mechanism of organismal homeostasis by dietary zinc restriction**
Souto Kitazawa (RIKEN Center for Biosystems Dynamics Research, Japan)
- P-27 The transcription factor Chronophage/BCL11A/B promotes intestinal stem cell proliferation and endocrine differentiation**
Jerome Korzelius (University of Kent, UK)
- P-28 Syrian hamster pluripotent stem cells for kidney organoid induction**
Dat Dien Le (RIKEN Center for Biosystems Dynamics Research, Japan)
- P-29 SKIP**
- P-30 Basement membrane components construct tissue environment to maintain hair follicle niche fibroblasts as mesenchymal aggregates**
Hiroki Machida (RIKEN Center for Biosystems Dynamics Research, Japan)
- P-31 Prediction of cell fates during embryogenesis based on geometry and topology**
Sangwon Lee (The University of Tokyo, Japan)
- P-32 Mitochondrial dynamics in gastrulation: Insights into morphogenesis and disease**
Somya Madan (Indian Institute of Science Education and Research (IISER) Pune, India)
- P-33 Functional analysis of asynchronous Hes1 oscillations in the neural tube formation**
Yuki Maeda (RIKEN Center for Brain Science, Japan)
- P-34 Decoding Hes1 oscillations in proliferating neural stem cells during embryonic neurogenesis**
Taimu Masaki (RIKEN Center for Brain Sciences, Japan)

- P-35 Dynamic cell proliferation control coupled with intestinal stem cell differentiation**
Shuji Matsuguchi (RIKEN Center for Biosystems Dynamics Research, Japan)
- P-36 Dopamine and Acetylcholine dynamics regulate sequential transitions in male sexual behaviors**
Ai Miyasaka (University of Tsukuba, Japan)
- P-37 A model for periodic patterning of tracheal cartilage rings**
Masahito Mori (The University of Tokyo , Japan)
- P-38 The Signaling Buffering System that Ensures Lifelong Maintenance of Intestinal Stem Cells**
(S6-2) May Nakajima-Koyama (Center for iPS Cell Research and Application (CiRA), Kyoto University, Japan)
- P-39 Self-organized periodic patterning driven by Wnt-responding chondrocytes**
Shogo Nakayama (RIKEN Center for Biosystems Dynamics Research, Japan)
- P-40 Quantitative characterization of torpor-associated behaviors in mice**
Akinobu Ohba (Nagoya University Graduate School of Medicine, Japan)
- P-41 Investigation of the Mechanism of Maintaining Amino Acid Homeostasis by Excretion in *Drosophila***
Ayano Oi (RIKEN Center for Biosystems Dynamics Research, Japan)
- P-42 Investigating the role of Cyclooxygenase-2 in integrating the cellular events inciting organogenesis during the development of zebrafish**
Lakshmi Pillai (The Maharaja Sayajirao University of Baroda, India)
- P-43 EMS mutagenesis screen to explore mechanisms of the newly identified cell death, erebosis in the *Drosophila* midgut**
Rahul Parit (RIKEN Center for Biosystems Dynamics Research, Japan)
- P-44 ECM as a driver and responder of tissue aging**
Eleanor Sheekey (RIKEN Center for Biosystems Dynamics Research, Japan)
- P-45 Transcriptomic Cell Type Atlas in the Thermoregulatory Brain Centers of Syrian Hamsters, a Hibernation Model**
Haruaki Sato (RIKEN Center for Biosystems Dynamics Research, Japan)

- P-46 Does Sleep Arise from the Trajectory of Neuronal States?**
(S1-4) Shoi Shi (University of Tsukuba, Japan)
- P-47 Comparison of patient tissue- to pluripotent stem cell-derived epithelial organoids**
Noah Shroyer (Cincinnati Children's Hospital, USA)
- P-48 Large Scale Generation of Luminogenic Functional Intestinal Spheroids in Microcapsules Using Droplet-Microfluidics**
Pooja Shukla (The University of Tokyo, Japan)
- P-49 Interactive training-based AI image analysis tool for 3D cell tracking**
Ko Sugawara (RIKEN Center for Biosystems Dynamics Research, Japan)
- P-50 Tubular Structure Formation of Bovine Uterine Glands under 3D *In Vitro* Culture Systems**
Yosuke Sugino (Okayama University, Japan)
- P-51 Harnessing endogenous stem cells for tissue regeneration in congenital organ deficits**
Mukhamad Sunardi (Kobe University Graduate School of Medicine, Japan)
- P-52 Single-cell CRISPR-activation screen identifies hepatic maturation regulators with zonal resolution**
Atsuhiko Taguchi (Chiba University Graduate School of Medicine, Japan)
- P-53 SKIP**
- P-54 Learning of maternal behaviors facilitated by a frontal cortical circuit to dopamine system**
Gen-ichi Tasaka (RIKEN Center for Biosystems Dynamics Research, Japan)
- P-55 Stereochemistry of lysophospholipid diastereomers determines growth cone attraction and repulsion mediated by GPR55 in a potential biased agonism mechanism**
Yuji Tatsumi (Kyoto University Graduate School of Biostudies, Japan)
- P-56 Transcriptomic Landscape of Microglia in Mouse Models of Social Dysfunction and Oxytocin-Mediated Recovery**

Masafumi Tsurutani (RIKEN Center for Biosystems Dynamics Research, Japan)

P-57 Emergent Tissue Morphogenesis in Limb Development: A Synergy of 2.5D, 3D Cultures and Mathematical Modeling

Rio Tsutsumi (Kyoto University, Japan)

P-58 Brainstem Neurons Orchestrating Multiple Thermogenic Pathways

Shuntaro Uchida (RIKEN Center for Biosystems Dynamics Research, Japan)

P-59 Canonical WNT signaling is the major factor of prostate progenitor differentiation in embryonic prostate development

Wataru Uno (RIKEN Center for Biosystems Dynamics Research, Japan)

P-60 Development and applications of FMO DB: a quantum chemical database for biomolecular interactions

Chiduru Watanabe (RIKEN Center for Biosystems Dynamics Research, Japan)

P-61 Neurotensin-expressing Sympathetic Preganglionic Neurons Delineate Specific Sympathetic Outflow Regulating Kidney and White Adipose Tissue

Serika Yamada (RIKEN Center for Biosystems Dynamics Research, Japan)

P-62 Optogenetic actin network assembly on lipid bilayer uncovers the network density-dependent functions of actin-binding proteins

Kei Yamamoto (RIKEN Center for Biosystems Dynamics Research, Japan)

P-63 Timely spindle bipolarization suppresses incorrect kinetochore-microtubule attachment during meiosis I in mouse oocyte

Shuheii Yoshida (RIKEN Center for Biosystems Dynamics Research, Japan)

P-64 Spatiotemporal measurement of pericyte-endothelium interaction and vascular morphogenesis dynamics via microvessel-on-a-chip platform

Hedeie Zeng (Institute of Industrial Science, The University of Tokyo, Japan)

P-65 Designing protein-based artificial kinetochores as microtubule decoys to prevent meiotic errors

Yuanzhuo Zhou (RIKEN Center for Biosystems Dynamics Research, Japan)

P-66 Establishment of a hiPSC-derived liver-on-a-chip for personalized drug metabolism studies

Isabel Tamargo-Rubio (University Medical Center Groningen, The Netherlands)
